## EDUCATION

---

### Vishwakarma University

*B. Tech. in Computer Engineering, Business Analytics - 7.61 CGPA*

Pune, Maharashtra

*May. 2020 – May 2024*

### D.S. High-School

*(HSC), Science Stream - 83.08%*

Bhusawal, Maharashtra

*2020*

### B.G.S.V. High-School

*(SSC) - 83.40%*

Jalgaon, Maharashtra

*2018*

## PROJECTS

---

### TechSphere E-Commerce Sales Analysis | *Excel, BigQuery (SQL), Tableau, Data Visualization*

- Analyzed 108K+ e-commerce transactions using BigQuery SQL and Excel, uncovering trends in revenue, product performance, customer behavior, and regional demand.
- Designed interactive Tableau dashboards with 10+ KPIs, enabling stakeholders to monitor sales performance, marketing effectiveness, refund rates, and geographic trends in real time.
- Delivered data-driven business recommendations that identified high-growth products and profitable market segments, supporting inventory optimization and targeted marketing strategies.

### Medicare Part D Prescription Drug Analysis | *SQL, Excel, Tableau, Healthcare Analytics*

- Processed and analyzed multi-million-dollar Medicare prescription spending data, evaluating utilization patterns, provider prescribing trends, and drug cost distribution across the Part D program.
- Built executive-level dashboards consolidating 10+ business and healthcare KPIs, enabling rapid assessment of prescription volumes, beneficiary utilization, and medication spending trends.
- Identified key healthcare cost drivers and utilization anomalies through SQL-based analysis, supporting evidence-based recommendations for expenditure management and resource allocation.

### Credit Risk Modeling and Default Prediction System | *Python, Pandas, Scikit-Learn, XGBoost, Streamlit*

- Processed 10K+ loan application records and engineered predictive features to identify drivers of borrower default risk and creditworthiness.
- Developed and tuned machine learning models achieving AUC greater than 0.90 and strong classification performance for credit risk assessment and borrower segmentation.
- Deployed an interactive credit scoring solution capable of generating default probabilities, risk ratings, and approval recommendations for data-driven lending decisions.

## PROFESSIONAL EXPERIENCE

---

### Data Science Trainee

July 2025 – Present

*Newton School of Technology*

- Successfully completed the Data Analytics phase and currently pursuing the Business Analytics phase, gaining expertise in Excel, SQL, Power BI, Python, Statistics, EDA, and Data Visualization.
- Completed 500+ hours of intensive hands-on training through assignments, coding assessments, case studies, industry projects, and mentor-led sessions.
- Applied SQL, Excel, Power BI, Python, Pandas, and NumPy to analyze datasets, build dashboards, track KPIs, and generate actionable business insights.
- Solved 100+ real-world analytical problems and business case studies while participating in coding contests, mock interviews, and technical evaluations.
- Collaborated with industry experts and mentors to develop data-driven solutions aligned with business objectives and stakeholder requirements.

## TECHNICAL SKILLS

---

**Languages:** Python, SQL, C++, HTML, CSS, JavaScript

**Libraries & Frameworks:** NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn, Plotly, TensorFlow, Flask

**Databases & Data Tools:** MySQL, PostgreSQL, Power BI, Tableau, Excel, Google Sheets

**Tools & Environments:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code (Cursor AI), Warp, Conda

**AI & Automation:** LLMs (ChatGPT, Claude, Gemini, Grok), Gamma (Presentation AI), NotebookLM, Julius AI, Quadratic AI

**Core Competencies:** Statistics, Probability, Machine Learning
